Discussion

- Files for HEC (US Army Corps Hydrologic Engineering Center) to test and who to be contact point between HEC and AQPI group
 - Maybe this should be a bigger conversation where we can invite someone from HEC? Basically, given our situation, what they think would be the best way to use the HEC software to get what we want.
- Blend QPF updates from NOAA team?
 - Discuss consistency (needed or not) between CNRFC forecasts, Local Weather Office forecasts, and AQPI QPFs?
- Possible future ensemble products from AQPI
